New Awards Received in January 2015

Carl Backer, M.D.

A single arm, prospective non-randomized, multi-center clinical evaluation of the St. Jude Medical Masters Series 15mm rotatable mechanical heart valve

*St. Jude Medical Cardiology Division, Inc.*

Barbara Burton, M.D.

An open-label extension of study HGT-HIT-045 evaluating long-term safety and clinical outcomes of intrathecal Idursulfase-IT administered in conjunction with intravenous Elaprase® in pediatric patients with Hunter....

*Shire Human Genetic Therapies, Inc.*

Michael Carroll, Ph.D.

Outlining the autonomic signature of Rett Syndrome

*Rett Syndrome Research Trust*

Sonali Chaudhury, M.D.

A phase II randomized, double-blind, placebo-controlled study to examine the effects of DAS181 in immunocompromised subjects with lower respiratory tract parainfluenza infection on supplemental oxygen

*Ansun Biopharma, Inc.*

Maria Dizon, M.D.

Alterations in the developmental regulation of microRNA expression in oligodendrocyte differentiation in response to hypoxia-ischemia

*Northwestern Memorial Foundation*

Robert Garofalo, M.D.

Personalized cognitive counseling with high risk adolescents

*Chicago Department of Public Health*

Testing and linkage to care for YMSM and transgender women

*Chicago Department of Public Health*
Ruchi Gupta, M.D.
Economic impact of food allergy on industry
*Sponsor Name Withheld*

Nancy Kuntz, M.D.
A phase 3 randomized, double-blind, sham-procedure controlled study to assess the clinical efficacy and safety of ISIS 396443 administered intrathecally in patients with later-onset Spinal Muscular Atrophy
*Isis Pharmaceuticals, Inc.*

Craig Langman, M.D.
An observational, longitudinal, prospective, long-term registry of patients with hypophosphatasia
*Alexion Pharmaceuticals, Inc.*

Jacqueline Pongracic, M.D.
A phase 2 study multi oral immunotherapy in multi food TBD allergic patients to test tolerance — MTAX study
*Sponsor Name Withheld*

Daniel Robinson, M.D.
Specialized pro-resolving mediators in preterm human breast milk
*Northwestern Memorial Foundation*

Ram Yogev, M.D.
An observational, non-interventional study in the United States to characterize respiratory syncytial virus hospitalizations among infants born at 29 to 35 weeks gestational age not receiving immunoprophylaxis
*AstraZeneca*

Luciana Young, M.D.
Development of a blood test for Marfan Syndrome
*Shriners Hospitals for Children*
New Awards Received in February 2015

Adam Becker, Ph.D., MPH
Planning process for an intervention to increase water consumption among Chicagoans
Sprague Memorial Institute

Colleen Cicchetti, Ph.D.
Cook County Violence Prevention Grant 2014
Umoja Student Development Corporation / Subcontract

The Resilience and Voice (R&V) Project: Building strength in urban schools and communities
Umoja Student Development Corporation / Subcontract

Hobuko Hijiya, M.D.
A retrospective non-interventional study of remission rates and survival among pediatric patients with relapsed or refractory B-cell precursor Acute Lymphoblastic Leukemia (ALL)
Children’s Hospital Los Angeles / TACL

Nancy Kuntz, M.D.
A multi-center study to evaluate the pharmacokinetics of 21-Desacetyldeflazacort and the safety of Deflazacort after oral administration of Deflazacort tablets to children and adolescent subjects with Duchenne Muscular Dystrophy
Marathon Pharmaceuticals, LLC

An open-label, multi-center, long-term extension study to evaluate the safety and tolerability of orally administrated Deflazacort in children and adolescent subjects with Duchenne Muscular Dystrophy
Marathon Pharmaceuticals, LLC

Susanna McColley, M.D.
Multiple Breath Washout (MBW) Training for the SHIP Study
Cystic Fibrosis Foundation Therapeutics, Inc.

A two-part multicenter prospective longitudinal study of CFTR-dependent disease profiling in Cystic Fibrosis (PROSPECT)
Seattle Children’s Hospital / Subcontract
Amy Paller, M.D.

Randomized, double-blind, parallel group, non-inferiority clinical trial of CeraVe Baby Diaper Rash Cream compared to Desitin Maximum Strength Original Paste for management of diaper dermatitis in infants

Northwestern University / Corporation subcontract

A phase 3, multi-center, randomized, double-blind, placebo controlled study of the efficacy and safety of SD-101 Cream in patients with Epidermolysis Bullosa

Northwestern University / Corporation subcontract

Riccardo Superina, M.D.

A phase 2, randomized, single-blind, controlled trial of topical Fibrocaps™ (Raplixa) in intraoperative surgical hemostasis in a pediatric population

The Medicines Company

Barry Wershil, M.D.

Molecular targeting of dietary therapy for Eosinophilic Esophagitis

Campaign Urging Research for Eosinophilic Disease (CURED)

Ram Yogev, M.D.

Clinical validation of the molecular-based BD MAX™ Extended Enteric Bacterial Panel and of the BD MAX™ Enteric Viral Panel for the detection of enteric pathogens from unpreserved and Cary-Blair preserved stool specimens

Becton Dickinson and Company
