

**Ann & Robert H. Lurie Children's Hospital of Chicago
Monthly Community Heliport Usage Report
August 2015**

Date	Point of Departure	Diagnosis	Patients Transported	Organs Transported	Lurie Children's Transport Team Needed	Flights
Aug-15	Grayslake	Allergic Reaction/Tachycardia	1	0	No	1
	Centegra/McHenry	Increased Work of Breathing/ h/o VSD	1	0	No	1
	Carle Foundation/Urbana	Mediastinal Mass/Respiratory Distress	1	0	Yes	2
	Carle Foundation/Urbana	Headache, s/p Brain Tumor Resection	1	0	Yes	2
	Silver Cross	Diaphragmatic Hernia/Pneumothorax	1	0	Yes	1
		August Totals	5	0	3	7
		Transports w/Lurie Children's Transport Team			60%	

Helicopter transport of a patient or organ involves an incoming flight to Lurie Children's with the child or organ on board, and a departing flight from the hospital after the child or organ is delivered. In some cases, it is essential to have Lurie Children's pediatric medical transport team escort the patient from the remote hospital to Lurie Children's. In these cases, the helicopter picks up the medical transport team from Lurie Children's and then flies to the referring hospital to begin care for the child while en route back to Lurie Children's. **During August 2015, three helicopter transports required Lurie Children's Transport Team. For two transports, Lurie Children's Transport Team flew out and returned by helicopter. For one transport, Lurie Children's Transport Team drove to the patient and returned by helicopter.**

**Lurie Children's Heliport Usage
Historical Data**

	Total Patient/ Organ Transports	Lurie Children's Transport Team Needed	% of transports w/ transport team	Total Patient Flights	% of Flights Between 8a-9p
2012 Totals	27	9	33%	31	71%
