

**Ann & Robert H. Lurie Children's Hospital of Chicago  
Monthly Community Heliport Usage Report  
January 2016**

Date	Point of Departure	Diagnosis	Patients Transported	Organs Transported	Lurie Children's Transport Team Needed	Flights
Jan-16	Silver Cross	Brain Lesion /Increased ICP	1	0	Yes	2
	Glenbrook	Head Trauma/Subdural,Epidural Hematoma	1	0	Yes	1
	Carle Foundation/Urbana	Hypnatremia/DI/ACDH Deficiency/Panhypopit	1	0	No	1
	Rockford Memorial	Brain Tumor	1	0	No	1
	Rockford Memorial	Bradycardia/Apnea	1	0	No	1
		<b>January Totals</b>	<b>5</b>	<b>0</b>	<b>1</b>	<b>6</b>
		<b>Transports w/Lurie Children's Transport Team</b>			<b>40%</b>	

Helicopter transport of a patient or organ involves an incoming flight to Lurie Children's with the child or organ on board, and a departing flight from the hospital after the child or organ is delivered. In some cases, it is essential to have Lurie Children's pediatric medical transport team escort the patient from the remote hospital to Lurie Children's. In these cases, the helicopter picks up the medical transport team from Lurie Children's and then flies to the referring hospital to begin care for the child while en route back to Lurie Children's. **During January 2016, two transports required Lurie Children's Transport Team. For one flight, the team was picked up at and returned with the patient to Lurie Children's. On the other flight, Lurie Children's transport team drove to the patient and returned to Lurie Children's by helicopter.**

**Lurie Children's Heliport Usage  
Historical Data**

	Total Patient/ Organ Transports	Lurie Children's Transport Team Needed	% of transports w/ transport team	Total Patient Flights	% of Flights Between 8a-9p
2012 Totals	27	9	33%	31	71%
