

**Ann & Robert H. Lurie Children's Hospital of Chicago
Monthly Community Helicopter Usage Report
June 2014**

Date	Point of Departure	Diagnosis	Patients Transported	Organs Transported	Lurie Children's Transport Team Needed	Flights
Jun-14	Northwest Community	Trauma/R/O/ Iliac Artery Bleed	1	0	NO	1
	Kishwaukee	Rule out bowel perforation	1	0	YES	2
		June Totals	2	0	1	3
		Transports w/Lurie Children's Transport Team			50%	

Any transport of a patient or organ involves an incoming flight to Lurie Children's with the child or organ on board, and a departing flight from the hospital after the child or organ is delivered. In some cases, it is essential to have Lurie Children's pediatric medical transport team escort the patient from the remote hospital to Lurie Children's. In these cases, the helicopter picks up the medical transport team from Lurie Children's and then flies to the referring hospital to begin care for the child while en route back to Lurie Children's. **During June 2014, one helicopter transport of a patient which landed at Lurie Children's required the Lurie Children's Transport Team.**

**Lurie Children's Helicopter Usage
Historical Data**

	Total Patient/ Organ Transports	Lurie Children's Transport Team Needed	% of transports w/ transport team	Total Patient Flights	% of Flights Between 8a-9p
