

**Ann & Robert H. Lurie Children's Hospital of Chicago
Monthly Community Heliport Usage Report
June 2016**

Date	Point of Departure	Diagnosis	Patients Transported	Organs Transported	Lurie Children's Transport Team Needed	Flights
Jun-16	Kishwaukee	Seizure/Respiratory Distress	1	0	No	1
	Edward	Trauma/Subdural/Subarachnoid Bleeds	1	0	Yes	1
	Morris	Head Trauma/Subdural Hematoma	1	0	No	1
	Rockford Memorial	Rattlesnake Bite/DIC	1	0	No	1
	Northwest Community	Incarcerated Inguinal Hernia/Bowel Obstruction	1	0	Yes	1
		June Totals	5	0	2	5
		Transports w/Lurie Children's Transport Team			40%	

Helicopter transport of a patient or organ involves an incoming flight to Lurie Children's with the child or organ on board, and a departing flight from the hospital after the child or organ is delivered. In some cases, it is essential to have Lurie Children's pediatric medical transport team escort the patient from the remote hospital to Lurie Children's. In these cases, the helicopter picks up the medical transport team from Lurie Children's and then flies to the referring hospital to begin care for the child while en route back to Lurie Children's. **During June 2016, two transports required Lurie Children's Transport Team. For both of these transports, Lurie Children's Transport Team drove out to the patient and returned Lurie Children's by helicopter.**
