

**Ann & Robert H. Lurie Children's Hospital of Chicago
Monthly Community Heliport Usage Report
May 2013**

Date	Point of Departure	Diagnosis	Patients Transported	Organs Transported	Lurie Children's Transport Team Needed	Flights
May -13	Centegra/McHenry	Status Epilepticus	1	0	No	1
	Edward	Trauma, Epidural Hemorrhage	1	0	No	1
	St. Joseph/Joliet	Septic Shock, Caudal Regression Syndrom	1	0	No	1
	Edward	Basilar Artery Occlusion, S/P Head Trauma	1	0	No	1
	Mercy/Harvard	S/P Cardiac Arrest, H/O AICD, Hypertrophic Cardiomyopathy	1	0	Yes	2
	Morris	Trauma/Head, Dog Bite	1	0	No	1
		March Totals	6	0	0	7
		% of Patient Transports with Lurie Children's Transport Team			16%	

Any transport of a patient or organ involves an incoming flight to Lurie Children's with the child or organ on board, and a departing flight from the hospital after the child or organ is delivered. In some cases, it is essential to have Lurie Children's pediatric medical transport team escort the patient from the remote hospital to Lurie Children's. In these cases, the helicopter picks up the medical transport team from Lurie Children's and then flies to the referring hospital to begin care for the child while en route back to Lurie Children's. **During May 2013, six children and no organs were transported to Lurie Children's. One flight required the Lurie Children's Transport Team.**
