

Ann & Robert H. Lurie Children's Hospital of Chicago
 Monthly Community Heliport Usage Report
 October 2012

Date	Point of Departure	Diagnosis	Patients Transported	Organs Transported	Lurie Children's Transport Team Needed	Flights
Oct-12	Central DuPage	VP Shunt Malfunction; Respiratory Failure	1	0	Yes	1
	Edward	Epidural Bleed	1	0	No	1
	Rockford Memorial	Seizures; Respiratory Failure	1	0	No	1
		October Totals	3	0	1	3
		% of Transports with Lurie Children's Transport Team			33%	

Any transport of a patient or organ involves an incoming flight to Ann & Robert H. Lurie Children's Hospital of Chicago with the child or organ on board, and a departing flight from the hospital after the child or organ is delivered. In some cases, it is essential to have Lurie Children's pediatric medical transport team escort the patient from the remote hospital to Lurie Children's. In these cases, the helicopter picks up the medical transport team from Lurie Children's and then flies to the referring hospital to begin care for the child while en route back to Lurie Children's. **During October 2012, three children and no organs were transported to Lurie Children's. For one of those patients, after Lurie Children's Transport Team members arrived at the referring hospital by ground transport, it was determined that helicopter transport was necessary for the return.**

**Lurie Children's Heliport Usage
 Historical Data**

	Total Patient/ Organ Transports	Lurie Children's Transport Team Needed	% of transports w/ transport team	Total Patient Flights	% of Flights Between 8a-9p
June 2012	4	1	25%	5	80%
