

**Ann & Robert H. Lurie Children's Hospital of Chicago
Monthly Community Helicopter Usage Report
October 2015**

Date	Point of Departure	Diagnosis	Patients Transported	Organs Transported	Lurie Children's Transport Team Needed	Flights
Oct-15	Bolingbrook	Head Trauma	1	0	Yes	1
	Centegra Memorial/Woodstock	Head Trauma/Epidural Hematoma	1	0	No	1
	Condell	Ruptured AVM	1	0	No	1
		October Totals	3	0	1	3
		Transports w/Lurie Children's Transport Team			33%	

Helicopter transport of a patient or organ involves an incoming flight to Lurie Children's with the child or organ on board, and a departing flight from the hospital after the child or organ is delivered. In some cases, it is essential to have Lurie Children's pediatric medical transport team escort the patient from the remote hospital to Lurie Children's. In these cases, the helicopter picks up the medical transport team from Lurie Children's and then flies to the referring hospital to begin care for the child while en route back to Lurie Children's. **During October 2015, one helicopter transport required Lurie Children's Transport Team. For this transport, Lurie Children's Transport Team drove to the patient and returned by helicopter.**
