	<b>September Totals</b>	<b>5</b>	<b>0</b>	<b>1</b>	<b>9</b>	
	<b>% of Transports with Lurie Children's Transport Team</b>			<b>20%</b>		

Any transport of a patient or organ involves an incoming flight to Ann & Robert H. Lurie Children's Hospital of Chicago with the child or organ on board, and a departing flight from the hospital after the child or organ is delivered. In some cases, it is essential to have Lurie Children's pediatric medical transport team escort the patient from the remote hospital to Lurie Children's. In these cases, the helicopter picks up the medical transport team from Lurie Children's and then flies to the referring hospital to begin care for the child while en route back to Lurie Children's. **During September 2012, five children and no organs were transported to Lurie Children's. For one of those patients, it was determined that Lurie Children's transport team members be present for the transport.**

**Lurie Children's Heliport Usage  
 Historical Data**

	Total Patient/ Organ Transports	Lurie Children's Transport Team Needed	% of transports w/ transport team	Total Patient Flights	% of Flights Between 8a-9p
June 2012	4	1	25%	5	80%
