New COVID-19 Flag for Room Cleans

Follow EVS protocols currently used for daily cleans. A discharge clean includes terminal clean and use of UV disinfection when available and is noted in EVS Management Portal by a NEW flag for COVID-19.

2105-1
Cleaning Protocol: Airborne/Contact, COVID-19
Part of 21, 21 N, 21 A, Full Hospital
Source: Discharge
[Details](#)

Important Details

- BEFORE entering patient room, check with clinical team to see if it is an appropriate time to enter
- PPE is not required for EVS staff when cleaning hallways/outside patient room
 - If NOT entering the patient room, use appropriate PPE for task being performed (example: gloves when handling chemicals)
 - N95 masks should not be used outside patient room
