ICAC

Does your child have Asthma?

Research is being done to learn if treatment with German cockroach allergen, given as allergy shots, given along with standard asthma care, makes children have less asthma symptoms.

To participate in this study your child must:

- Be 6 to 17 years old
- Have a history of asthma
- Be taking an asthma medication daily

Participation in this study will include:

- Answering questions about your child's health
- Having an asthma medical provider manage your child's asthma
- Reimbursement for your time
- Your child will be asked to do breathing tests, an allergy skin test, and give blood, nasal samples, and receive allergy shots

For more information, please call: 312-227-6451

Principal Investigator: Jacqueline Pongracic, MD

This study, Lurie Children's IRB # 2018-1927, conducted by Jacqueline Pongracic, MD, Principal Investigator and the content of this flyer has been reviewed and approved by the Western IRB and accepted by Lurie Children's IRB.
