

Does your Toddler Wheeze?

Your child may be eligible to participate in a research study at Lurie Children's Hospital to see if the medication Xolair[®] can prevent wheezing children from developing asthma as they grow older.

If your Child is 2 or 3 years old and has had 2-4 wheezing episodes in the past year, they may be eligible.

Eligible participants will receive:

- Health exams
- Allergy testing
- Compensation for time and travel
- Study supplies/medications

For more information email us at AllergyResearch@luriechildrens.org or call us at (312) 227-6474

Principal Investigator: Jacqueline Pongracic, MD
