

How To Use An AED On A Child

An AED may resuscitate a child in cardiac arrest. An AED can do this by delivering shocks to the heart to restore normal rhythm.

An AED will not shock a child without detecting an abnormal rhythm.

6000

In the U.S. in 2014, ~6000 children 18 years and younger died of sudden death.

5 MIN

An AED is most effective if used within 5 minutes after collapse.
